Walking & cycling: the economic benefits

What is this pack?

This pack outlines the economic benefits of encouraging more walking and cycling in cities. It sets out the strongest evidence from London and elsewhere, grouped into six major topic areas.

It is aimed at policy makers, local communities, officers in local and national government, business networks and everyone else who is interested in how investment in walking and cycling can create more prosperous cities.

This pack has been produced by Transport for London (TfL) as part of an ongoing collaboration with partners across London, and has been published as part of TfL's <u>online hub</u> for the economic benefits of walking and cycling. We are particularly grateful to representatives from the Department for Transport, the University of Westminster, GlaxoSmithKline, the London Boroughs of Enfield, Hackney and Southwark, the Bicycle Association, Sustrans, the London Cycling Campaign, Cycling UK and Living Streets for their support in developing this evidence base.

OVERVIEW

Investment in walking and cycling helps encourage more Londoners to travel in a greener and healthier way. It also brings significant benefits for the economy:

Boosting the high street and local town centres: walking and cycling improvements can increase retail spend by up to 30%.

Keeping the city moving for business:

New cycle lanes in London have helped some streets carry up to 5% more people at the busiest times.

Reducing absences and increasing productivity: People who are physically active take 27% fewer sick days each year than their colleagues.

Wider Economic

Benefits: Investing in walking and cycling and can prevent billions of pounds worth of health and environmental damage.

Attracting employees and businesses: Businesses see walking and cycling as key to attracting and retaining the staff the

Helping everyone share the benefits:

need to thrive

Active travel is accessible and inclusive. Making it easier to walk and cycle means that more Londoners can enjoy the benefits

Walking & cycling is good for the high street

People walking and cycling visit high streets more frequently and spend more money there compared to people in cars

High streets that are nice places to walk, cycle and spend time in attract more shops, making the high street more economically viable and vibrant

The proposed north-east and east-west routes will help us attract and retain the employees our business needs to thrive. They will also make London a more attractive city in which to build and run our business

John Ridding, CEO of Financial Times

Walking & cycling keeps London moving

Congestion costs London's economy £9.5bn each year, and the challenge will grow as the city's population grows and travel increases

Walking and cycling, along with public transport, are the most efficient uses of limited road space. By encouraging walking and cycling we can move more people on our streets. This keeps the city moving for everyone

KEEPING STREETS MOVING

London is growing by...

Today the population is

6 new residents
every hour

8,800,000

and by 2030, it will be

That's a car load every 40 minutes

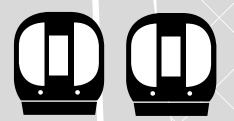

10,000,000

2 Buses every day

or

Tube trains every week

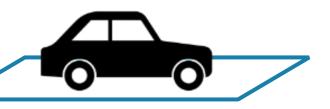

Congestion costs London's economy

Source: INRIX, 2017

KEEPING STREETS MOVING

One car takes up the same space as...

5 people cycling

or

20 people walking

or

12 cycle parking spaces

1.56 people

The average car in London carries:

KEEPING STREETS MOVING

Segregated cycle lanes on Blackfriars Bridge help the street move

5% more people

in the am peak than before

Businesses using cycle freight save between

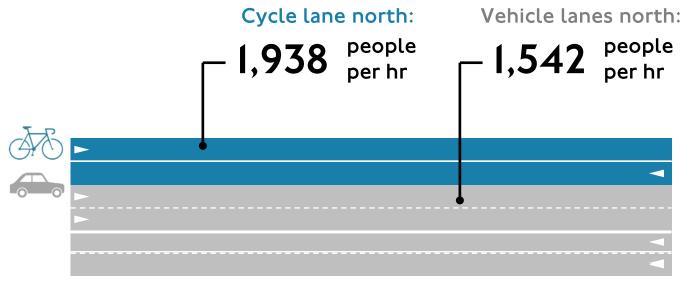

39 and 64%

on delivery costs

BLACKFRIARS BRIDGE, AM PEAK 08:00 - 09:00

Walking & cycling helps the wider economy

Walking and cycling already make an important contribution to Britain's economy, and encouraging more people to walk and cycle will provide a further boost

Investment in walking and cycling is a costeffective way to unlock these benefits, including significant savings to the NHS

VALUE FOR THE ECONOMY

13:1

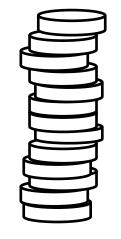

is the average 'Benefit Cost Ratio' for walking and cycling projects

this means for every

spent
on
walking
and
cycling,

of benefits are returned to the

economy

Based on the BCRs reported ... one can confidently conclude that sustainable travel and cycling and walking in particular regularly offer

high and very high value for money

Cycling contributes

£5.4bn

each year to the UK economy

...more than

the contribution of the UK steel industry

Source: Newson and Sloman, 2018

SUPPORTING THE NHS

If every Londoner walked or cycled for 20 minutes each day, this would save the NHS

£1.7bn

in treatment costs over 25 years

If as a nation we keep piling on the pounds around the waistline, we'll be piling on the pounds in terms of future taxes needed just to keep the NHS afloat.

I don't think it's any exaggeration to say that the health of millions of our fellow citizens, the sustainability of the NHS, and the economic prosperity of Britain now depends on a radical upgrade in prevention and public health.

Source: Department of Health, 2011

SUPPORTING NEW DEVELOPMENT

As the Cycle Hire scheme has expanded outside of central London and into areas that are a lengthy walk from the Tube, we have seen a dramatic increase in tenant enquiries for those areas

Marc von Grundherr, Director, Benham & Reeves Residential Lettings

Source: Steer, 2017

The fact that buyers expect cycle storage in new developments affects saleability and desirability of the property ... if we did not provide cycle parking, desirability of the properties would be negatively affected

Linden Homes

Source: Steer, 2017

Everyone shares the benefits

Everyone should be able to benefit from London's economic success

Walking and cycling are inclusive ways to travel that can help people access employment and opportunities easily and cheaply

The economic benefits of walking and cycling are not constrained to central London: businesses in all parts of the Capital can benefit from making it easier to walk and cycle

ACCESSIBILITY AND AFFORDABILIT

The economic benefits of walking and cycling can be enjoyed by everyone in London

of Londoners Say they can cycle, including...

older people (aged 65+)

76% of disabled people

Active travel is more affordable Average cost of travel each year:

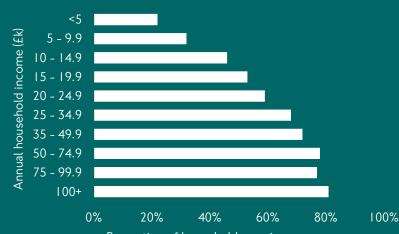

£7,300

Yearly cost of running a car in London

Car ownership in London increases with household income

Proportion of households owning one or more cars

Source: London Travel Demand Survey, 2013/14

SUPPORTING BUSINESSES ACROSS LONDON

The economic benefits of walking and cycling can be enjoyed everywhere in London

Over

99%

of London employers are small and medium-sized enterprises

SMEs provide

1/2 London's jobs

SUMMARY

The evidence in the pack shows that investment in walking and cycling has the potential to bring significant benefits across a number of facets of the economy.

In London, TfL and boroughs are working to make walking and cycling easier for everyone by investing in initiatives to address the barriers to walking and cycling, including improved streets and community grants. The evidence in this pack can be used to support this investment by:

- Making the case for overall investment in walking and cycling to decision makers:
- Informing the strategic narrative for walking and cycling business cases;
- Supporting consultation and engagement around specific schemes and projects.

The pack can be used in its entirety, or specific content can be extracted to contribute to presentations or other documents. A full reference list is provided, and further information can be found on the economic benefits of walking and cycling <u>online hub</u>.

We would like to keep the pack regularly updated with the latest research, evidence and case studies on the economic impacts of walking and cycling.
